RE: Expiration of ML 51303-MP; Timely Reclamation Required

Dear Mr. Haas:

Please note that on April 30, 2009 the above numbered Mineral materials Permit expired and you no longer have any right to remove any type of building stone or permitted substances from the permitted premises.

You are still obligated to complete reclamation of the lands mined at the Fayette Quarry as required by state law. On May 4, 2009 the Director of the Trust Lands Administration took action authorizing you to enter upon the lands permitted under ML 51303-MP, at your own risk and sole liability for personal injury or property damage, until the end of May 2009 to complete the required reclamation work. Said reclamation must be performed to the standards required by the Division of Oil, Gas & Mining and in accordance with the terms and conditions of ML 51303-MP.

Failure to complete the required reclamation of the Fayette Quarry by the end of May, 2009 may result in action by the Trust Lands Administration against any bonding monies you have on file with the Division of Oil, Gas & Mining or the Trust Lands Administration for the reclamation of said property. Please contact me if you have any questions. I look forward to examining the completed reclamation work at the end of May, 2009.

Sincerely,

John T. Blake
Trust Land Specialist
